FOR IMMEDIATE RELEASE

SpecTIR LLC Acquires AutoVision

Reno/ Oct. 2, 2007/ --SpecTIR, LLC announces the acquisition of AutoVision, a firm specializing in engineering solutions for hyperspectral imagers, machine vision, and industrial automation. AutoVision's founder, Mr. Wes Procino, has agreed to join the staff of SpecTIR as Vice President. Mr. Procino brings years of experience in the engineering, design and fabrication of hyperspectral imaging systems for industrial automation. The addition of AutoVision as the engineering division of SpecTIR continues the company's vertical integration of spectral imaging markets. In addition to remote sensing systems, AutoVision has a proven track record in the design and application of hyperspectral imaging systems for production line quality control and assurance in the wood, paper, textile and related industries.

SpecTIR now offers customers expertise in all aspects of hyperspectral industrial automation, machine vision, and the collection and analysis of airborne data. SpecTIR's business divisions include SpecTIR Analytical Solutions (SAS) for imagery analysis and creating GIS products. SpecTIR Remote Sensing (SRS) offers the collection and processing of remote sensing data with an emphasis on airborne hyperspectral imaging. AutoVision brings the design, fabrication, and sales of precision color spectral imaging products and solutions into the organization. In addition, SpecTIR is a distributor of the full line of Specim, Ltd, imaging spectrograph products in the US and South America, and provides sales, service, and support for the VNIR, SWIR, and soon to be available, LWIR spectral instruments.

Current markets served by SpecTIR include the oil, gas and mineralogical exploration industries; industrial automation and machine vision applications to control manufacturing processes; DoD for airborne and ground based hyperspectral sensors; R&D for DoE and USDA; and the UAV markets for compact hyperspectral imagers. In addition, the firm provides environmental surveys and analysis for forestry, agriculture, and water quality, and partners with many LiDAR and remote sensing companies around the world.

About SpecTIR

SpecTIR, a Service Disabled Veteran Owned Small Business Concern, is known for innovative spectral imaging instruments, on-demand hyperspectral data collection, and generation of imagery products from all source data for business, academia, and governments. SpecTIR proudly represents Specim Ltd's (Oulu, Finland) spectral imaging products and the full line of airborne and industrial instruments in the US and South America. You can contact SpecTIR via the web at www.SpecTIR.com or William Bernard (wbernard@SpecTIR.com) at 410 820 5591.
