

Hyperspectral Imaging

Imaging + Spectroscopy = Hyperspectral Imaging The UK's first Academic Sponsored HSI Conference

**“THE ONLY PLACE
YOU’LL WANT TO
BE FOR ACCESS TO
THE MOST
INNOVATIVE
EMERGING TECH
NEWS AND
INFORMATION.”**

Please contact, Kevin Lynch at
kevin.lynch@gildenphotonics.com
to register for this conference.
Deadline is March 26th, 2010.
Limited places available

April 13th & 14th 2010
University of Strathclyde

The University of Strathclyde in conjunction with Gilden Photonics Ltd will soon be launching the UK's first Hyperspectral Imaging Centre of Excellence. As a prelude to this event the University of Strathclyde is pleased to announce their first Hyperspectral Imaging conference.

Hyperspectral Imaging brings together many technologies creating a powerful analytical tool.

Meet the experts from Industry and Academia. Find out how HSI could be the solution to your particular problem. (Samples are welcomed)

The course will cover the basics to practical hands on. How the technology works? What the limitations are? How HSI crosses the technology spectrum?

We will explore this and other important questions at HSI Conference in 2010 through two full days of keynotes, tutorials, and sessions in some of these content areas:

- Colour Inspection and sorting
- Forensics
- Recycling
- Chemical Imaging
- Process Analytical Technology (PAT)
- Photovoltaics & Semiconductors
